2010 Ohio’s Metropolitan and Micropolitan Statistical Area Delineations

Ohio’s revised delineations reflect the Standards for Delineating Metropolitan and Micropolitan Statistical Areas that the Office of Management and Budget (OMB) published on June 28, 2010, in the Federal Register (75 FR 37246-37252).

The purpose of the Metropolitan and Micropolitan Statistical Area standards is to provide nationally consistent delineations for collecting, tabulating, and publishing Federal statistics for a set of geographic areas.

- **Metropolitan Statistical Area**—A Core Based Statistical Area (CBSA) that has at least one urbanized area with a population of 50,000 or more, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.

- **Micropolitan Statistical Area**—A CBSA that has at least one urban cluster with a population of at least 10,000, but less than 50,000, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.
