

Employment Situation: Ohio and U.S. (Seasonally Adjusted)

Civilian Labor Force

Ohio's unemployment rate was 4.3% in October 2024, down from 4.5% in September 2024. The number of unemployed in Ohio in October was 256,000, down from 263,000 in September 2024. The number of unemployed has increased by 45,000 in the past 12 months from 211,000. The Ohio unemployment rate increased from 3.6% in October 2023.

The U.S. unemployment rate for October 2024 was 4.1%, unchanged from September 2024 but up from 3.8% in October 2023.

Ohio and U.S. Unemployment Rates (Seasonally Adjusted)

lost 3,600 jobs in durable goods (-2,200) and nondurable goods (-1,400). Mining and logging gained 100 jobs over the year.

Employment in the private service-providing sector increased 38,000 as gains in private educational and health services (+33,200); professional and business services (+8,400); leisure and hospitality (+5,700); and other services (+5,400) surpassed losses in financial activities (-11,800); trade, transportation, and utilities (-2,400); and information (-500).

Government employment increased 10,300 as gains in local (+11,400) and federal (+900) government outpaced losses in state government (-2,000).

Ohio Nonfarm Employment Over-the-Month Change (Seasonally Adjusted)

Payroll Survey

Over-the-Month Change: Ohio's nonagricultural wage and salary employment increased 6,400 over the month, from a revised 5,675,600 in September to 5,682,000 in October, according to the latest business establishment survey conducted by the U.S. Department of Labor (Bureau of Labor Statistics) in cooperation with the Ohio Department of Job and Family Services (ODJFS).

Employment in goods-producing industries, at 946,600, did not change over the month, as gains in manufacturing (+200) were offset by losses in mining and logging (-100) and construction (-100).

The private service-providing sector, at 3,943,600, increased 6,100 as gains in private educational and health services (+2,500); leisure and hospitality (+2,400); financial activities (+1,300); other services (+1,100); and information (+800) surpassed losses in trade, transportation, and utilities (-1,900) and professional and business services (-100).

Government employment, at 791,800, increased 300 with gains in local (+700) and federal (+200) government exceeding losses in state government (-600).

Over-the-Year Change: From October 2023 to October 2024, nonagricultural wage and salary employment increased 53,000. Employment in goods-producing industries increased 4,700, led by construction, which added 8,200 jobs. Manufacturing

<sup>a</sup>Data for latest month are preliminary, although other months are subject to revision. Subtotals may not add to totals due to rounding. Unemployment rates are computed from unrounded figures. All data exclude military personnel. <sup>b</sup>Data are Local Area Unemployment Statistics estimates based on place of residence. <sup>c</sup>From the Current Employment Statistics Survey, a monthly survey of approximately 23,960 employers conducted by the U.S. Bureau of Labor Statistics. Estimates represent nonagricultural wage and salary jobs by place of work.

Seasonally adjusted nonfarm employment data for the Ohio Metropolitan Statistical Areas may be accessed at the Bureau of Labor Statistics website at <http://www.bls.gov/sae/>.

**Percent Change in Ohio Nonfarm Employment by Month  
January 2000 - October 2024  
(Seasonally Adjusted)**

Recessionary periods as defined by the National Bureau of Economic Research (NBER).

Note: In June 2015 the seasonal model for state government employment was updated to account for improved data collection. To preserve the continuity of the time series, the updated seasonal factors were applied back to October 2014. The series affected are state government, total government, and total nonfarm employment. If you have any questions about the updates, please email [ContactLMI@jfs.ohio.gov](mailto:ContactLMI@jfs.ohio.gov).

## Ohio Metropolitan Statistical Areas (MSAs)

Developed by the United States Office of Management and Budget, Metropolitan Statistical Areas are integrated geographic regions comprised of at least one city or urban area (with a population of at least 50,000) and adjacent communities. Metropolitan Statistical Areas make it possible for federal statistical agencies to utilize the same boundaries when publishing statistical data.

## Akron Metropolitan Statistical Area Not Seasonally Adjusted

Portage and Summit Counties

**Over-the-Month Change:** Nonfarm payroll employment in the Akron metropolitan area totaled 339,700 in October 2024, an increase of 2,100 jobs from September. Employment in the goods-producing sector, at 53,000, increased 100 in manufacturing. Employment in the private service-providing sector, at 245,200, increased 1,500 as gains in trade, transportation, and utilities (+700), professional and business services (+600), private educational and health services (+300), financial activities (+100), and other services (+100) exceeded losses in leisure and hospitality (-300). Government employment, at 41,500, increased 500 as gains in state (+400) and local (+200) government surpassed losses in federal government (-100).

**Over-the-Year Change:** Nonagricultural wage and salary employment decreased 2,800 from October 2023 to October 2024. Goods-producing industries lost 900 jobs in manufacturing (-700) and mining, logging, and construction (-200). Private service-providing industries increased 1,400 as gains in private educational and health services (+800), professional and business services (+400), leisure and hospitality (+400), other services (+300), and trade, transportation, and utilities (+200) exceeded losses in financial activities (-500) and information (-200). Government employment decreased 3,300 over the year, as losses in state (-3,600) and federal (-100) government exceeded gains in local government (+400).

# Cleveland-Elyria Metropolitan Statistical Area Not Seasonally Adjusted

Cuyahoga, Geauga, Lake, Lorain, and Medina Counties

**Over-the-Month Change:** Nonfarm payroll employment in the Cleveland-Elyria metropolitan area totaled 1,077,600 in October 2024, an increase of 6,600 jobs from September. Goods-producing industries, at 157,200, decreased 1,000 as losses in mining, logging, and construction (-1,200) exceeded gains in manufacturing (+200). Private service-providing industries, at 783,200, increased 5,700 as gains in private educational and health services (+2,400), trade, transportation, and utilities (+1,600), professional and business services (+1,200), leisure and hospitality (+600), and information (+100) exceeded losses in financial activities (-200). Employment in other services did not change over the month. Government employment, at 137,200, increased 1,900 in local (+1,500) and state (+400) government. Employment in federal government did not change over the month.

**Over-the-Year Change:** Nonagricultural wage and salary employment increased 8,700 from October 2023 to October 2024. Goods-producing industries lost 3,700 jobs in manufacturing (-2,100) and mining, logging, and construction (-1,600). Employment in private service-providing industries increased 9,600 as gains in private educational and health services (+7,200), leisure and hospitality (+2,600), professional and business services (+2,500), trade, transportation, and utilities (+1,200), and other services (+400) exceeded losses in financial activities (-3,800) and information (-500). Government employment increased 2,800 in local (+2,500), state (+200), and federal (+100) government.

## Ohio and Metropolitan Statistical Areas Hours and Earnings of All Employees<sup>a</sup> Not Seasonally Adjusted

In October, Ohio's total private employees' average weekly earnings were \$1,103.29 a decrease of \$15.20 from September but an increase of \$27.58 from October 2023. The average workweek of 34.2 hours in October decreased 0.3 hours from September and from October 2023. Average hourly earnings decreased 16 cents from September to \$32.26. Over the year, average hourly earnings have risen by 3.5%.

## Ohio and Metropolitan Statistical Areas Hours and Earnings of Production or Nonsupervisory Employees<sup>a</sup> Not Seasonally Adjusted

Ohio's production employees in manufacturing industries earned an average of \$1,087.10 per week in October 2024, a decrease of \$17.63 from September but an increase of \$48.84 from October 2023. The average workweek of 41.1 hours in October decreased 0.4 hours over the month but increased 0.4 hours over the year. Average weekly earnings in durable goods, at \$1,132.03, decreased \$19.37 over the month but increased \$43.36 over the year. Average weekly earnings in nondurable goods, at \$1,004.70 decreased \$18.27 over the month but increased \$60.64 over the year.

## Ohio Selected Unemployment Insurance Activities Not Seasonally Adjusted

Initial claims filed under the Ohio Unemployment Compensation Law numbered 29,368 in October 2024, up 41.1% from September and 12.5% from October 2023. The average weekly number of benefit recipients, at 31,958, increased 2.1% from September and 7.7% from October 2023. Total benefits paid, at \$71.1 million, increased 13.5% from September. The average weekly benefit payment of \$488.84 in October 2024 increased \$18.70 from October 2023. At the end of October 2024, there were 266,203 active employer accounts, up 1,128 from September and 1,320 from October 2023.

## Ohio Job Openings and Labor Turnover Survey Data Seasonally Adjusted

The Job Openings and Labor Turnover Survey (JOLTS), conducted by the U.S. Department of Labor (Bureau of Labor Statistics), produces data series showing the number of job openings, hires, and total separations by state. Total separations include quits, layoffs and discharges, and other separations. Individually, these series provide insightful information on demand in the labor market. They also can be combined to provide additional information, such as the statewide Quits-to-Layoffs-and-Discharges Ratio and the Unemployed-Persons-to-Job-Opening Ratio.

### Quits-to-Layoffs-and-Discharges Ratio (Q/LD)

The ratio of quits to layoffs and discharges can help with analyses of business cycles and differences among industries. Quits move in a direction opposite that of layoffs and discharges, and the Q/LD ratio clearly reflects business cycle trends and turning points. The ratio rises during expansions and falls during contractions. It can be an indicator of confidence in the economy.

If the Q/LD ratio is greater than 1.0, the number of quits exceeds the number of layoffs and discharges. If the ratio is less than 1.0, layoffs and discharges exceed quits. A value greater than 1.0 indicates that employee confidence in the labor market is strong. A value less than 1.0 indicates that employees are not confident in the labor market.

The Q/LD ratio for Ohio decreased from 2.0 in July to 1.6 in August 2024 and decreased from 2.2 in August 2023.

The blue horizontal line represents the baseline of 1.0 to which current Q/LD ratios are compared during analysis.

## Ohio Job Openings and Labor Turnover Survey Data Seasonally Adjusted

### Unemployed-Persons-Per-Job-Opening Ratio

This ratio is derived by taking the number of estimated unemployed people and dividing it by the number of job openings each month. These two components come from two different surveys. The number of unemployed people comes from the Current Population Survey. The number of job openings comes from JOLTS.

Ratios less than 1.0 signal tighter labor markets, in which organizations have more job openings than there are people looking for work. In contrast, ratios greater than 1.0 indicate slack in the labor supply, as more unemployed people compete for each job opening.

The unemployed-persons-per-job-opening ratio in Ohio was 0.8 in August 2024, down from 0.9 in July but up from 0.6 in August 2023.

The blue horizontal line represents the baseline of 1.0 to which current Unemployed Persons to Job Opening Ratio are compared during analysis.

## Technical Notes

Except as noted, all data cited are produced by the U.S. Department of Labor, Bureau of Labor Statistics, in cooperation with the Ohio Department of Job and Family Services.

### Civilian Labor Force Estimates (CLFE)

Based on the Current Population Survey (household survey) and Local Area Unemployment Statistics (LAUS) program.

### Civilian Noninstitutional Population

Persons 16 years of age and older who are not inmates of institutions (for example, penal and mental facilities, homes for the aged), and who are not on active duty in the armed forces.

### Civilian Labor Force

Persons in the civilian noninstitutional population, employed or unemployed during the reference week (usually the week including the 12<sup>th</sup> of the month) distributed by place of residence.

### Employed

Persons in the civilian noninstitutional population who, during the reference week, (a) worked at least one hour as paid employees; worked in their own business, profession, or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family; and (b) all those who were not working but who had jobs or businesses from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor-management dispute, job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job. Excluded are persons whose only activity consisted of work around their own house (painting, repairing, or own home housework) or volunteer work for religious, charitable, and other organizations.

### Unemployed

Persons in the civilian noninstitutional population who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment sometime during the four-week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.

### Data Revisions

Figures for the current month are preliminary; revised figures are released when preliminary data for the next month are released. For example, revised March figures are released at the same time as preliminary April figures are released.

Revisions at the end of the year are called 'annual processing' and typically, adjustments are made to the previous two years for not seasonally adjusted data and five years for seasonally adjusted data. Adjustments are made because more information becomes available throughout the year on nonfarm jobs and unemployment claims. Also, during annual processing, new population controls are incorporated into the estimates. Population controls refer to population data such as vital statistics on births, deaths, migration, school enrollment, persons living in group quarters, inmates in institutions, etc. These are updated annually by the Census Bureau and provided to the BLS.

### Payroll Survey

Nonagricultural wage and salary employment, including hours and earnings estimates, are based on monthly reports from the Payroll Survey of employers under the Current Employment Statistics (CES) program. The CES survey is based on approximately 131,000 businesses and government agencies representing approximately 670,000 worksites throughout the United States.

### Industrial Classification

Employer establishments are classified by industry based on their principal product or service. The North American Industry Classification System (NAICS) is used for industrial classification. (See page 53.)

### Coverage

Monthly reports on employment, payroll, and hours are obtained from approximately 23,960 Ohio employers.

### Estimating Method

Total employment is estimated from the employment of establishments reporting for two consecutive months, as follows:

$$\frac{\text{Sample Employment (Current Month)}}{\text{Sample Employment (Previous Month)}} \times \text{Total Employment (Previous Month)} = \text{Total Employment (Current Month)}$$

### Nonagricultural or Payroll Employment

The total number of persons on establishment payrolls employed full or part time who received pay for any part of the pay period which includes the 12<sup>th</sup> day of the month. Temporary and intermittent employees are included, as are any workers who are on paid leave, or who work during only part of the specified pay period. A striking worker who only works a small portion of the survey period, and is paid, would be included as employed under the CES definitions. Persons on the payroll of more than one establishment are counted in each establishment. Data excludes proprietors, self-employed, unpaid family or volunteer workers, farm workers, and domestic workers. Persons on layoff the entire pay period, on leave without pay, on strike for the entire period or who have not yet reported for work are not counted as employed. Government employment covers only civilian workers.

## Technical Notes

### Hours and Earnings

Average hours are computed by dividing total production employee hours worked during one week (the seven-day period which includes the 12<sup>th</sup> of the month) by number of production employees reported for such week. Average hourly earnings are computed by dividing total production employee payroll for one week by total production employee hours for that week. Average weekly earnings are derived by multiplying average hourly earnings by average weekly hours.

**Production employees** include working supervisors and all nonsupervisory employees (including group leaders and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (such as power plant), recordkeeping, and other services closely associated with production operations.

**Nonsupervisory employees** include employees such as office and clerical workers, repairers, salespersons, operators, drivers, attendants, service employees, line installers, laborers, accountants, janitors, guards, and other employees whose services are closely associated with those of occupations listed.

**Payroll** refers to dollars paid for full- and part-time production, construction, and nonsupervisory employees who received pay for any part of pay periods that include the 12<sup>th</sup> of the month. Payroll is reported before deductions for Social Security, group insurance, withholding tax, bonds, and union dues; also includes pay for overtime, holidays, vacations, and sick leave paid directly by the firm. Bonuses (unless earned and paid regularly each pay period), tips, pay not earned in pay period reported (such as retroactive pay), and value of free rent, fuel, meals, or other payments in kind, excluded.

**Hours** represent hours worked or paid for, during pay periods which include the 12<sup>th</sup> of the month, for production, construction, or nonsupervisory employees. Hours include time paid for holidays and vacations, and for sick leave when pay received directly from firm.

### Employment Error Measures

Error measures for state and area employment estimates are available on the following website: <http://www.bls.gov/sae/790stderr.htm>.

### Seasonal Adjustment

Seasonal adjustment removes the effects of events that follow a more or less regular pattern each year. These adjustments make it easier to observe the cyclical and other nonseasonal movements in a data series.

### Data Revisions

*Additional sample receipts are the primary source of the monthly CES employment revisions.* CES begins collecting sample reports for a reference month as soon as the reference period, the establishment's pay period that includes the 12<sup>th</sup> of the month, is complete. Collection time available for first preliminary estimates ranges from two to three weeks, depending on the scheduled date for the Employment Situation news release.

Given this short collection cycle for the first preliminary estimates, many establishments are not able to provide their payroll information in time to be included in preliminary estimates. CES sample responses for the reference month continue to be collected, are incorporated into the series, and are released the following month.

### Benchmarks

Sample-based estimates remain final until employment levels are reset to universe employment counts, or benchmarks; the benchmarks are primarily derived from Unemployment Insurance (UI) tax records. The annual benchmarking process results in revised data back to the last annual benchmark for not seasonally adjusted series and back five years for seasonally adjusted series.

For the establishment, or CES survey, annual benchmarks are constructed in order to realign the sample-based employment totals of each year with the Unemployment Insurance (UI) based population counts. These population counts are much less timely than sample-based estimates and are used to provide an annual point-in-time census for employment.

### Job Openings and Labor Turnover Survey (JOLTS)

JOLTS defines Employment as all persons on the payroll who worked during or received pay for the pay period that includes the 12<sup>th</sup> of the month. JOLTS defines Job Openings as all positions that are open (not filled) on the last business day of the month. JOLTS defines Hires as all additions to the payroll during the month. JOLTS defines Separations as all employees separated from the payroll during the month.

Nationwide, the sample frame for the JOLTS sample consists of approximately 8 million establishments on the Bureau of Labor Statistics' ES-202 Quarterly Census of Employment and Wages file. This scope covers private nonagricultural establishments as well as Federal, State, and local government entities in the 50 States and the District of Columbia. Railroads are sampled from an auxiliary frame. The JOLTS scope does not cover private households (NAICS 814110) or agriculture, forestry, fishing and hunting (NAICS 11). However, logging (NAICS 1133) is included. The JOLTS sample size is approximately 16,000 business establishments.

## Types of Businesses by North American Industry Classification System

### Goods-Producing (Private)

Mining and Logging	Mining and support activities, oil and gas extraction, cutting and transporting timber
