Ohio Economic Profile Fairfield County

Ohio Department of Job and Family Services
Office of Workforce Development

July 2021

1. Employment Percent by Industry

The table below shows how jobs are distributed throughout the county by industry. The higher the percentage, the more workers there are in the industry. Multiple years are shown to demonstrate how employment in the industries may have shifted over time. However, percent change across years does not necessarily indicate growth or decline in employment by industry.

1a. Employment Percent by Industry

	Percent Annual Employment in Indust			
Industry Name	2004	2010	2019	
Health Care and Social Assistance	16.4%	18.5%	19.8%	
Retail Trade	15.9%	15.7%	14.2%	
Accommodation and Food Services	9.2%	10.4%	12.3%	
Manufacturing	13.5%	12.3%	10.3%

2. Employment, Wage and Firm Size Trends

The next series of tables and graphs provide more information on the top 3 industry shares of county employment for the most recent year identified in the previous chart. Detailed information includes annual employment and wage trends for the three sectors. Employment and wage trends showfluctuations and indicate growth or decline over the years.

^{*}Data non-disclosable as it does not meet U.S. Census Bureau publication standards. Columns may not sum to 100 percent due to both U.S. Census Bureau methodology and the effects of rounding. The difference between summed percentages (<100%) and 100 is not the employment share of the non-disclosed industry.

2a. Employment Trends—Health Care and Social Assistance, Retail Trade, and Accommodations and Food Services

Source: U.S. Census Bureau, Quarterly Workforce Indicators, excludes federal government.

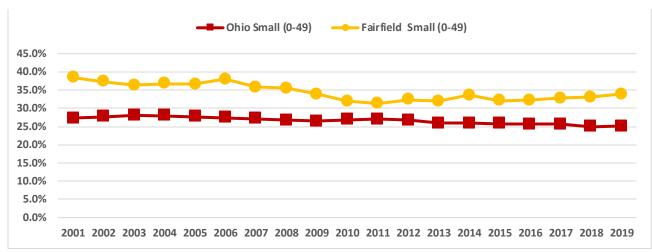

2b. Wage Trends – Health Care and Social Assistance, Retail Trade, and Accommodations and Food Services

Source: U.S. Census Bureau, Quarterly Workforce Indicators, excludes federal government.

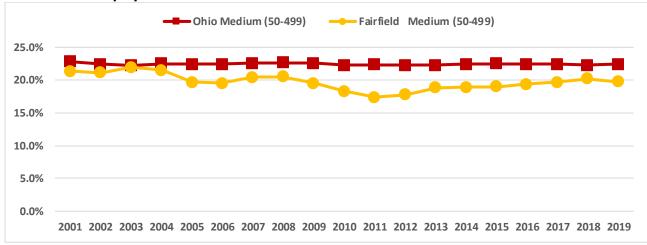

The following three charts compare the percentage of employment in firm size between the county and Ohio. Tables comparing firms with 0-49 employees (small firms), 50-499 employees (medium firms), and, 500+ employees (large firms) are shown. When a large firm dominates an area, downturns in that industry will have a greater impact on a county than when employment is dispersed among many small or mid-size firms.

2c. Percent of Employment in Small Firms

4. Industry Turnover Rates

The following table looks at industry turnover rates for Ohio and by county. Turnover rates are calculated from stable employment (employment that lasted one calendar quarter with the same employer) and are an indicator of job churn. Industries with high churn will have more openings to replace workers than industries with low churn. It should be noted that this calculation does not include short-term employment that lasts less than a full quarter.

4a. Industry Turnover Rates, Statewide and County

-	Ohio				Fairfield County			
Industry	201901	201902	201903	2019Q4	201901	201902	201903	2019Q4

^{*}Data non-disclosable as it does not meet U.S. Census Bureau publication standards.

5. High School Enrollment

The table below shows annual enrollment trends for high school seniors for public, private and charter schools by fiscal year, where FY 1 represents the school year 2018-2019. Enrollment is the count of students in October of the school year. School enrollment is important as it has implications for the workforce as well as the county's capacity to accommodate its students. Enrollment changes can be affected by boundary changes or redistricting. Also presented in the table is information regarding the number of Ohio Means Jobs.com K-12 accounts that migrated to regular OMJ accounts.

5a.	Number	of Hiah	School	Seniors

	OMJ K-12				
Fiscal Year	Public	Private	Charter	Total**	Accts Migrate to Regular Acct***
2015	1,649	87	44	1,779	
2016	1,733	68	40	1,841	126
2017	1,702	102	36	1,840	258
2018	1,838	79	0	1,917	578
2019	1,813	84	<10	1,897	780
2020	1,759	85	<10	1,844	728

^{*}Source: Ohio Department of Education. All data that represents < 10 students is masked to ensure student privacy.

6. Local Area Talent Report

The next set of tables highlight resumes or talent in the local area. This data provides useful information on the workforce in the local area and presents a snapshot of skills and educational levels. The local reports are created using the Monster.com Talent Dashboard tool and are based on activity or logging into OhioMeansJobs.com or Monster.com in the previous three years. The workforce skills table is organized in ascending order and starts with the skill reported least often and ends with the most reported skill.

Resume Snapshot (April 2021)

There were 1.5 million total resumes in Ohio Means Jobs.com of Ohio ans and others willing to relocate to Ohio. Resume counts for the county, veterans and restored citizens are shown below. Note: resumes for restored citizens are for individuals in carcerated in the Ohio Department of Rehabilitation and Correction who had an active resume and a release date in 2021.

				Total Individuals
	Total	Total Veteran	Total Restored	with a Disability
County	Resumes	Resumes	Citizen Resumes	Resumes
Fairfield	10,788	775	7	18

7. Educational Attainment

The following table shows the distribution of educational attainment by age group for county residents. Educational attainment refers to the highest level of education completed.

7a. Educational Attainment by Age Group

Age categories	Less than 9th grade	9th to 12th grade, no diploma	High school graduate (includes equivalency)	Some college, no degree	Associate's degree	Bachelor's degree	Graduate or professional degree	Total
18 to 24 years	139	1,764	5,182	4,264	528	982	76	12,935
25 to 34 years	170	937	5,042	4,806	2,217	3,637	1,401	18,210
35 to 44 years	145	866	5,567	4,251	2,277	4,558	2,379	20,043
45 to 64 years	614	2,077	14,128	9,005	4,155	7,662	4,643	42,284
65 years and over	1,164	1,696	10,775	4,519	1,140	2,782	1,683	23,759

Source: American Community Survey, 5-year estimates, 2015-2019.

8. Veteran Employment at the Local Level

The following table represents a snapshot of veteran and nonveteran labor force population (i.e., estimate of the employed and those looking for work); the labor force participation rate (i.e., percent of the total population participating in the labor force); and the unemployment rate (i.e., percent of the labor force that is unemployed). Veterans are those who have ever served on active duty in the U.S. Armed Forces, Reserves, or National Guard.

8a. County Veteran and Nonveteran Employment Estimates

	Nonveterans	Veterans
Labor Force Population	71,732	4,408
Labor Force Population Rate	76.9%	79.8%
Unemployment Rate	3.6%	2.2%

Source: American Community Survey, 18-64-year-olds, 5-year estimates, 2015-2019.

9. Civilian Labor Force and Commuting Patterns

The next set of tables look at the civilian labor force and commuting patterns of workers in the county. The civilian labor force is the sum of the employed and unemployed. It is based on civilians 16 years of age and over who are working or seeking work. It excludes military personnel, persons in institutions, those studying or keeping house full-time, retirees, and volunteer workers. This is the available workforce, and used in conjunction with commuting patterns data, one can see where workers in the county live and work. Commuting information is based on all jobs held. Commuting trends data are also presented to see inflow and outflow trends of workers, including the top work counties for out-commuters and top home counties for in-commuters.

Muskingum County, OH	778
Athens County, OH	695
Delaware County, OH	498
Ross County, OH	407
Montgomery County, OH	343

Source: U.S. Census Bureau, OnTheMap. Includes all jobs, 2nd quarter only.

10. Area Population to Jobs

The graph below and map on the next page look at the population to jobs ratio. The prime working age population consists of those ages 18 to 64. However, not everyone in the working age population is employed – they may be going to school, caring for children or others, or retired. As the population -to-jobs ratio increases, there are more workers living in the county than there are jobs, meaning there will be more competition for jobs in that county. Workers in high-ratio counties may be more likely to commute to other counties for work. A lower population-to-jobs ratio would indicate the county could have a higher ratio of in-commuters. This will be rare, but a population-to-jobs ratio less than one would indicate there are more jobs than workers. The graph below compares the county population to jobs ratio to the statewide ratio. The map shows population to jobs ratio for all counties.

11. Profile of UI Claims

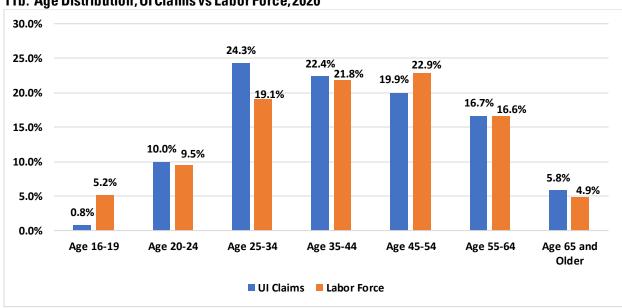

The next set of charts compares demographic characteristics of unemployment insurance claimants and people in the labor force for the county. These graphs can show if some segments of the labor force are filing higher proportions of claims. However, certain industries with seasonal work patterns and/or typical shut down periods, such as construction and manufacturing will have higher proportion of men than women. Differences between the labor force and UI claimants can be used to target intervention and training programs.
