

July Snapshot of Ohio OnLine® Job Postings

More than 185,900 job openings were posted online from June 14, 2013, through July 13, 2013, for the state of Ohio, according to data from The Conference Board, a global, not-for-profit independent business and research association. This was a decrease of 8,208 ads from the previous reporting period. Compared to the same time period a year ago, this reflects a decrease of 1,568 ads.

This report, and reports for other Ohio regions, can be found [here](#) and at www.ohiomeansjobs.com.

EDITOR'S NOTE: The graphs and tables are from The Conference Board Help Wanted OnLine® (HWOL) data series, which are compiled with Wanted Analytics software. Third-party, staffing agencies and anonymous employers are not included.

This information is a snapshot in time and may not represent long-term trends. Any of this data, including historical reports, may vary slightly over time, as minor revisions are continually made to this live database. An ad may appear in two counties but may only be counted once at a higher geographic level. This information should be used in conjunction with local labor market information to analyze current occupational demand.

This data has not been seasonally adjusted. Sometimes seasonal adjustment is used to remove fluctuations in unemployment and labor force trends that normally occur with changes in the season. Seasonal variation in employment occurs for natural and institutional reasons, including reduced employment involving outdoor activities during winter, changes in labor force and unemployment levels with opening and closing of schools, and layoffs during the automobile model changeover period. Seasonal variations can also affect the number of online job ads, so over the year it will affect the data in this report.

The Conference Board is a global, not-for-profit independent business membership and research association working in the public interest. Wanted Technologies Corporation is a leading supplier of real-time sales and business intelligence solutions for the media, classified and recruitment industries. The Wanted Analytics system aggregates real-time data from thousands of online job sites, real estate and newspaper sites, as well as corporate websites on a daily basis.
